The village itself was split into two enumeration districts, called 4a & 4b. To see a copy of the the actual record sheets used in the village for the 1851 census click on the numbers below. These records show information such as the groupings in each household, the occupation of each person, whether they were a worker or employer and both marital & disability status. The record will open up in a new screen. If it appears too too small to read, just roll your mouse over the image and a resize button will appear. Then click on that.

The list below is an alphabetical list of the 547 names on the 1851 census. This was about the largest population that the village had ever had since the 1720 (the earliest record I have). It has still not reached that level yet. Hanslip Nice was the enumerator who collected all the information. He was the miller of the village and died in 1876, aged 76.
